Summary

I'm a dedicated front-end developer who doesn't just focus on the User interface of my work,but the interactivity and also accessibility to the page by anyone willing to view it.

Experience

Axia Africa | Nigeria, Lagos
Front-end developer

I learnt how to use the core technologies of the web such Html, css, and JavaScript also learnt how to use libraries such as bootstrap, Tailwind and React.js ||

So far through out my time there in the academy I created different type of page like dashboard,landing page,also created an app with React.js || After 3 months of intense learning I can say I can create the pages listed out and I have an handsome hand in using those Css libraries (Tailwind and bootstrap)|| You can view my portfolio to see the projects I have been engaged in https://balodim-portfolio.netlify.app/
